## HEAVITREE QUARRY TRAILS SURVEY FORM GUIDANCE NOTES

Date:

Name of Surveyor/s:

Contact email:

Tel:

### **PART ONE: What do you see?**

Map ID (Mark a map with e.g. X1, X2 etc. and indicate the reference here)	Location/Context Description (Describe the exact location, as well its surrounding context. Please be specific about the location)	Feature Description (Is your feature a boundary wall, a building, something else?)	Estimated extent of feature (eg length of wall)	Average size of blocks (A visual estimate is fine – we can come back)
Estimated % mixed with other stone (What proportion of the feature itself is Heavitree Stone? Within the same course/feature is it mixed with other stone types?)	Is it a basal course? (ie is it underneath something else?)	If so, describe the feature above it?	Quality of cut (Poor/good/notably good)	Photo filenames

**PART TWO: Questions?**

Please record here the questions you have asked yourself during your survey. What features have surprised you? Is there something that seems puzzling, out of context or confused? We may not know the answers to questions immediately but it is in the search for the answers that the most interesting work is often done.
